Summary

Results-driven Full-Stack Developer with 3+ years of experience building scalable web applications using Django and Vue.js. Specialized in REST API development (DRF), database optimization, and pixel-perfect UI implementation from Figma designs. Passionate about clean code and agile workflows.

Technical Skills

Backend Development

- **Python (Django, DRF)** – Building scalable web apps, RESTful APIs, authentication (JWT/OAuth), PostgreSQL/MySQL optimization.
- **API Development** – Django REST Framework (DRF), GraphQL, WebSockets (real-time features).
- **Database Design** – MySQL, query optimization, schema modeling.

Frontend Development

- **JavaScript (Vue.js, React)** – Single-page applications (SPAs), Vuex/Pinia state management, component-based architecture.
- **HTML5/CSS3** – Responsive design, CSS frameworks (Tailwind, Bootstrap), cross-browser compatibility.
- **UI/UX Integration** – Figma-to-code implementation, pixel-perfect frontends, accessibility (WCAG).

Education

- Self-taught, front-end developer UI/UX designer.
- Certificate in back-end development from ALX Africa.

Additional Skills

- **Version Control** – Git, GitHub.
- **Deployment** – Docker, AWS (EC2/S3), Heroku, Vercel.
- **Technical Writing** – API documentation (Swagger/OpenAPI), READMEs.
